

At CFM, we believe that diversity is a catalyst for innovation. We believe that exchanging different ideas and perspectives stimulates better solutions and results. This is why we nurture an inclusive and cooperative workplace where employees can bring their authentic self and fully contribute to our success. DEI is an integral part of our strategy and a great source of pride for our firm.

Our teams are key to our performance and have allowed us to position CFM at the forefront of modern investment management. In a complex and changing world, we believe that strong governance is essential to deliver the best results. CFM has created committees, working groups and task forces to implement our business strategy, including its DEI components. We also extend our commitment outside our walls, focusing on initiatives supporting women, including in quantitative finance, and helping people from socioeconomically disadvantaged backgrounds. We are proud to count on passionate actors who are committed to make a difference in our firm and society.

Our organization is committed to ensuring that all employees are fairly treated, feel valued and are given the tools to thrive at work. We believe that a clear business strategy supported by engaged individuals is key to deliver powerful and lasting impact.
